ABSTRACT

This project is an intuitive and cost-effective app designed exclusively for college students, facilitating the buying and selling of pre-owned books in both hard copy and soft copy formats. Key features include an easy-to-use interface for listing, searching, and purchasing books. Users can browse a wide selection of titles, designate a format (hard copy or soft copy), and offer their books for sale. Preview pages are also included in soft copy editions. An integrated chat system ensures seamless transactions.

The app promotes community engagement by encouraging student-to-student interactions. It also serves as a sustainable solution by reducing textbook waste and supporting the reuse of educational resources. User reviews and ratings enhance the trustworthiness of the marketplace. The app is an innovative tool that promotes accessibility, sustainability, and affordability on college campuses. It redefines the way students access and exchange textbooks, ultimately enhancing the college experience.
